Full-stack software developer specializing in front end development, with experience in JavaScript, Python, and React. I am looking for an entry level position at a growing mid-size company with a strong engineering culture where I can learn. I have strong professional skills in project management and communication with active involvement in the developer community through my technical blog.

TECHNICAL SKILLS

Expert

- JavaScript, Node, Express, React, jQuery
- Python, Django
- HTML, CSS, Bootstrap
- Git, GitHub, npm, REST APIs

Proficient

- Java, Spring
- Next.js, MongoDB, Mongoose
- SQL, MySQL, SQLite
- Heroku, Amazon Web Services

EXPERIENCE

Vibes Check | Engineering Project

Music playlist creator and curator application

<https://github.com/tiffchannn/vibesCheck>

- Built Python/Django application to allow users to create, add, update and delete songs and playlists
- Integrated and collected data from third-party API, using search based information to create self-developed database
- Implemented RESTful back-end with SQLite utilizing MTV structure to organize and maintain persistent data
- Enforced Bcrypt function to enhance user security and data protection

Los Angeles, CA

November 2020

Hiya! | Engineering Project

Social Media Platform

<http://github.com/mkshin1/HIYA>

- Developed a microblogging and social networking service where users can create, share, like posts and add comments
- Utilized React for front-end capabilities, while Express fueled the server and Mongoose handled the database
- Architected server side with Express and built database with MongoDB/Mongoose, designing all models and writing API CRUD operations while also implementing RESTful APIs
- Intertwined Bcrypt, Cookies, and JSON Web Tokens to ensure users are validated and authorized during login and registration
